

## Making the Most of the Supporting Materials in the Toolkit

### Links to Commonly Used Screening Instruments and Tools

The American Academy of Pediatrics does not approve nor endorse any specific tool for screening purposes. This table is not exhaustive, and other screening tools may be available. For best results, it is recommended that users review available instruction manuals before administering, scoring, and analyzing results of the scoring tools. Availability of a tool in multiple languages does not correlate to validation of the tool in such languages.

Links provided for these commonly used tools go to the author or the owner (or both) of the specific tool to ensure accessibility to the most up-to-date version of the specific tool. Review and comply with any copyright and permissions requirements before use.
